Environment-Resistant Digital Gage LINEAR GAGE LG100 Series Compact-type Counter EJ Counter

Sensor Systems

IP67 G

Can be used inline or in measurement cells

Best-in-class precision and environmental resistance.

Enables real-time measurement and data management

Can be used in various production settings

High accuracy

Precision and accuracy demanded by the automated assembly and inspection markets, are guaranteed. Due to our expertise as a manufacturer of measuring instruments, repeatability in the full measurement range (2σ) and narrow-range precision are also guaranteed.

Environment resistance

Sliding durability of more than 50 million cycles*, with protection level of IP67G. A highly oil-resistant material is used in the rubber cap and cable sheath, so it can be used even in harsh environments.

* 10 mm range models (Actual value from in-house tests)

Reference point detection

Reference point signal output functions are featured throughout this series. When incorporating into a device the master setting value is easy to set and is retained after shutdown. The ability to recall the origin ensures excellent reliability.

Combining compact size and ease of use

High-speed and compact, delivering production site visualization, improved productivity, and information feedback. Up to 8 compact counters (EJ counters) can be linked providing the capacity to connect up to 16 gages. On a DIN rail, each unit can be connected directly without using cables, so it takes up minimal space. All linked units and gages can be driven by a single power source.

USB

CC-Link connection, USB connection

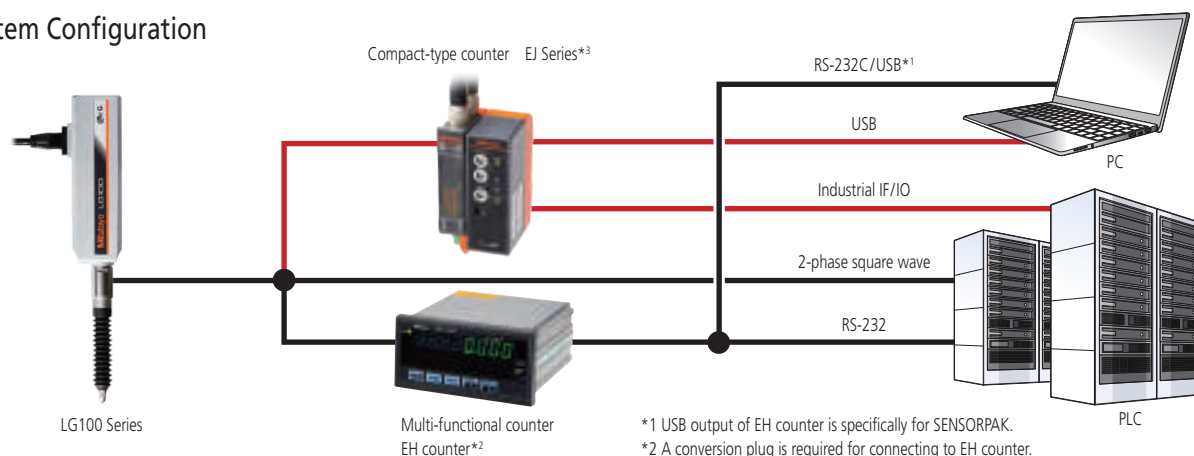

Data can be output through an industrial interface (CC-Link) by linking a compact counter (EJ counter) with an interface unit. Constant data monitoring and positional management are performed. A USB interface is also provided for easy connection with a computer.

Note: The range of interfaces is set to be expanded in the near future.

Calculation function

Enables sum difference operations between 2 gages connected to the same counter. Functions such as tolerance judgment and peak hold are also included.

System Configuration

*1 USB output of EH counter is specifically for SENSORPAK.

*2 A conversion plug is required for connecting to EH counter.

*3 Conventional gages can be connected using conversion connectors.
(Please contact us for details of connectable gages.)

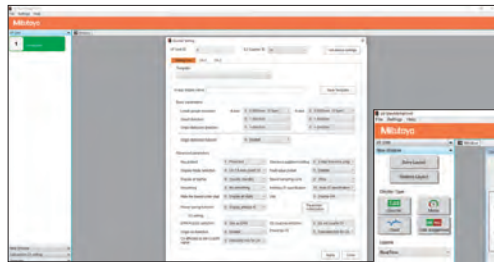

SOFTWARE

LG QuickSetupTool

A configuration tool is FREE for use with the EJ counter when connected via the optional USB interface. Multiple settings normally carried out with counter operating keys can now be easily applied from a computer.

Live displays allow for easily viewing gage positions or measurements at a glance.

Note: This software can be used free of charge and downloaded

Extension cable

Extension cable 5 m: **21HZA197**

Extension cable 10 m: **21HZA198**

Extension cable 20 m: **21HZA199**

Total length (gage to counter) must not exceed 20 m.

Conversion plug for connecting to EB/EG/EV Counter

21HZA195 (Standard type)

21HZA196 (With origin point mark)

Adapter shown installed on EH Counter

Standard type (for P counter): **21HZA195**

With origin point mark (for Z counter): **21HZA196**

APPLICATION

Battery flatness measurement

Insertion depth check

Base material warp detection

Stage positioning

Air knife gap detection

Roll gap measurement
