

RUPTURE DISC HOLDER W/ SAFETY SHROUDS

10-15K RUPTURE DISC ASSEMBLY, 1/2" NPTM 15K

Part No. 35-008-XXX

A rupture disc is an essential component in any system that contains a positive displacement pump. It provides protection against excessive pressure building up in the water blasting equipment connected to a pump. Our rugged, compact rupture disc holder offers safety features to prevent the use of coins or other disc substitutes, which may prove dangerous to operators or cause damage to the blasting equipment. The domed deflector minimizes spray in the event of a disc rupturing, and it is simple to replace a disc.
