

Micrometer Setting Standard

Item number: 167-101

Images

Description

A Mitutoyo precision length standard for accurately setting a micrometer at the start or end of its measuring range. Can also be used for setting other types of continuous-scale measuring instruments at a certain point within the measuring range when wishing to use the narrow-range accuracy capabilities of that instrument.

Features

Inch-Metric:

Metric

Length (L):	25 mm
Diameter (D):	6,35 mm
Accuracy:	$\pm 1,5 \mu\text{m}$
Flatness:	$0,3 \mu\text{m}$
Parallelism:	$2 \mu\text{m}$
Measuring face:	Micro-lap finish
Delivered:	In a carton box
